

# Aluminium, powder-coated

## Material, Maintenance & Storing

It's Thyme

### Material

Cane-line offers a wide range of furniture in powder-coated aluminium. Powder coating serves as a protective layer that is tinted in a variety of colours.

Aluminium furniture is ideal for use outdoors as well as indoors.

### Maintenance & cleaning

Aluminium furniture generally requires a minimum of maintenance.

If the furniture is stored near the coast, it will need to be cleaned more frequently using fresh water and soap.

Don't be too rough on your furniture to avoid causing dents, as this can damage the powder coating. At worst, moisture can reach the aluminium and damage the finish.

Vases, glass and similar items can lead to marks on the surface, if there is moisture under the item for more days. Make sure to keep the surface clean and dry, if things / items are put on the table for several days.

### Storing

Your furniture can stay outdoors all year round, but it is best to store it under a furniture cover during winter months or during periods when the furniture is not in use. Please note, however, that condensation can form under the furniture cover, which can cause mould and mildew. Therefore, make sure to lift the cover away from the furniture to ensure proper air circulation and minimise condensation.

If possible, it is best to store your furniture indoors during winter months to protect it from the elements.

### Variants

				
Lava grey (AL)	Black (AS)	White (AW)	Light-grey (AI)	Taupe (AT)
				
Mocca (AMO)	Yellow (AY)	Marsala (AP)	Bordeaux (ABR)	Dusty rose (ADR)
				
Olive green (AD)	Dark green (ADG)	Aqua (AA)	Dusty blue (AC)	Midnight blue (AB)
