

Solution dyed polyester / Cane-line Virtue

Material, Maintenance & Storing

Material

Solution dyed polyester/Cane-line Virtue is a 100% solution dyed fibre material, which, due to the special manufacturing process, means that the colour permeates the entire fibre. The fabric has a superior colour fastness, making it fade resistant. The colour is extremely uniform, and the fabric is both UV resistant and water repellent, as well as resistant to powdery mildew. The fabric ventilates effectively, repelling condensation and moisture. It feels slightly softer than Olefin fabric.

Maintenance & cleaning

In case of stains, we recommend pre-treating the fabric by washing it in warm water with a powerful detergent (e.g. Tide, Persil, Vanish). The fabric can then be washed at 30 degrees and subsequently air dried.

It is very important to check the fabric for stains and treat the specific stain before washing, as heat can set the stain, making it difficult to remove. High temperatures in the washing machine or a tumble dryer can cause the fibres to melt together, shrink or become misshapen. Water that is too hot can create permanent creases during the spin cycle.

THE FABRIC MUST NOT BE CHEMICALLY CLEANED!

Storing

We recommend using a cover out of season. However, we recommend covering it with a parasol cover during the winter or prolonged periods when not in use. Be aware of the importance of "lifting" the cover every so often to allow the air to circulate and remove any condensation.

Mud (TY507)

Light grey (Y506)

Light grey (YN906)

Olefin (Solution dyed)

Material, Maintenance & Storing

Material

Olefin is the generic name for polypropylene. It is popular due to its durability, colour fastness following exposure to light, quick dry ability, stain resistance and mildew resistance.

Olefin feels slightly coarser than solution dyed polyester fabric.

Maintenance & cleaning

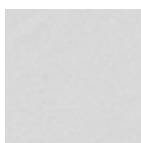

Olefin fabrics are durable and tough, but they do hold onto oily stains.

We recommend the same cleaning methods as for solution dyed polyester; see above.

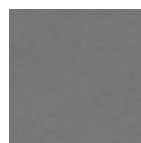

Storing

We recommend using a cover out of season. However, we recommend covering it with a parasol cover during the winter or prolonged periods when not in use. Be aware of the importance of "lifting" the cover every so often to allow the air to circulate and remove any condensation.
