Butterfly Wall

Design by: Sven I. Dysthe

If a fluttering creature decided to morph into a wall sconce, the Butterfly wall light designed by Sven Ivar Dysthe would be the form it would long to embody. Fashioned from steel, the fixture is surprisingly festive for its modern lines. The shades are clasped by clean-lined arcing plates that surround it like wings. The glow of the light from its interior reflects luminously off the curved plates that flow out from the wall.

Ordering Matrix

Model

320 = White
322 = Brass
323 = Dark Green

LED

1 x 4.5W E26, A19, 2700K
*GU24 base available upon request.

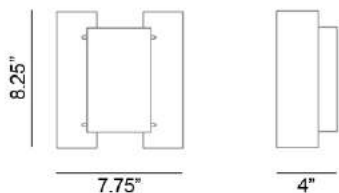

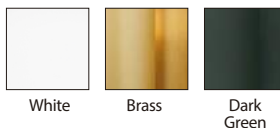

Finish
