Gear Table

Design by: Johan Lindsten

If the phrase “like a cog in a wheel” brings to mind old industrial fittings, we must introduce the Gear table lamp because it is so contemporary in its cleverness, it will be a stand-out in interiors from modern to loft contemporary. The smartness of this lamp, designed by Johan Lindstén, eclipses its style, as the shade height and angle are adjustable by merely moving a lever. Made of aluminum and steel, the Gear table lamp comes in a matte black finish that enhances the masculinity of its lines. We also offer the Gear in a floor lamp.
